Abstract

Design

Identify your research design, data collection strategies and specific factors (such as independent variables), conditions or groups in your study and any control conditions. Include the setting in which the interaction occurs, and your relationship to this setting. State why this research project must be conducted (when indicated) at a Paralympic Games and not at another venue. Include what type of access is required (e.g., field of play, audience grandstands, Paralympic Village, etc.). Please note that not all access can be guaranteed.

List of Questionnaires/Tasks given to each research participant (copy of each instrument to be attached to this Application):

Participants

Number:

Age Group:

Gender:

Method of selection/recruitment:

If minors or other vulnerable participants are involved, outline procedures to obtain their agreement (assent) to participants, in addition to the consent of parent(s) or guardian(s):

Is there compensation for participation? Yes No

If 'yes', what kind of compensation applies (report in USD if cash)?

Benefits

Identify any beneficial effects that the research may have on the participants:

Identify any benefits that humankind in general may gain from this research:

Risks

Describe any psychological, social, legal, economic or physical discomfort, stress or harm (above and beyond those risks inherent in sport participation) that might occur to research participants. How will these be held to the absolute minimum? What remediation is offered?

(if no risks are foreseen, state “no risks are foreseen”)

How will the data be stored? How are all research participants protected from potentially harmful future use of the data collected in this project? Specify whether participation will be anonymous or confidential (it cannot be both) and specify measures planned to ensure anonymity or confidentiality. If audio or videotapes are used, state specifically who will see them and that date they will be erased (remember to include this information on the Consent Form as well).

Do the data collected relate to illegal activities? If so, please explain.

Yes

No
